ATTRACTION

We can sometimes escape from jail; but we cannot escape from our thoughts. Unwise thinking is the key to imprisonment, and wise thinking is the key to freedom. Thought is the key, which locks or opens all the doors of Life. Dominant thoughts select which doors we choose to open. Shall we visit heaven or hell today?

Thought is a fickle foundation; if cracked or unstable, nothing of substance can stand for long upon it, no matter how elegant the structure we build above it through our illusion. We attract people, places, and events into our lives by the polarity of our thinking, just as surely as the north pole of a magnet attracts south. Crime, poverty, war, destruction and disease — all are attracted to those thoughts, which encourage and empower them. This attraction may be on a personal level, as a group or even a nation. We can attempt to lock up or even kill an enemy, but ten more wait eagerly outside the castle door. The war of

duality always obliges our hidden desires, until we declare the balance of inner peace.

The outer world is a reflection of the inner world. The outer world is a mirror, which Life holds in front of us, so that we can see ourselves the way others see us. A painted face is temporary at best. But when our dominant thoughts change, the outer world also changes automatically, for it reflects the essence of our new state of mind.

No society can ever breed laws and justice systems greater than the wisdom of its collective Soul. Illusion grows illusion, and Love grows Love. We reap what we sow. lacktriangle
